1. Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant's arguments filed 10/30/06 have been considered and are persuasive. In particular the prior art cited of record does not teach the combination of the first and second temporal fastening member, the first fastening member having a plurality of engaged parts formed along the protruding direction of a positioning projection and the second fastening member provided in the other one of the lamp unit and frame member and having an engaging part adapted to engage with the engaged parts provided in the first fastening member. The prior art cited does not anticipate individually nor teach in combination the following limitations: A lamp mounting apparatus, comprising: an outer panel member mounted on a frame member of a vehicle and defining a part of an outer surface of the vehicle; a lamp unit disposed adjacent to said outer panel member; a positioning projection protruding from one of said outer panel member and said lamp unit; a positioning opening formed in the other one of said outer panel member and said lamp unit, said positioning hole adapted to receive said positioning projection; positioning abutment parts provided in said lamp unit and said outer panel member, and said positioning abutment parts abut one another when said positioning projection has been inserted into said positioning hole, to thereby position said lamp unit at a predetermined location along a protruding direction of said positioning projection; a first temporal fastening member protruding from one of said lamp unit
